PREFACE

This report has been prepared by the Alberta Bureau of Statistics to provide information on the residents in Alberta's 79 Provincial Electoral Districts. All data have been tabulated by Statistics Canada from information collected during the 1981 Census of Canada. Hence, the reference point is census day, 3-Jun-81.

The information in this report contains all variables which received 100 percent survey coverage. These data elements range from population characteristics and family size, to the number of children at home and housing type.

Additional information was collected from a 20 percent sample of the census population. This information includes variables such as labour force activity, income, ethnic origin, and educational attainment. When this census information becomes available a second report for the Provincial Electoral Districts will be prepared.

To ensure the accurate interpretation of the statistics provided herein, users should refer to Appendix I for specifics regarding methodology and data quality and the glossary (Appendix II) for the definitions of the terms.

Should you have any questions with respect to any aspect of this report, or require additional information, please contact the Data Dissemination Unit, Alberta Bureau of Statistics, telephone (403) 427-3058.

APPENDIX I

TECHNICAL NOTES

The data contained within this report is tabulated from information collected during the 1981 Census of Canada, held 3-Jun-81. Sponsored by the Government of Canada, the Canadian Census of Population and Housing is the sole source of accurate, comprehensive, economic and demographic statistics for Canada, the provinces, and sub-provincial areas.

For the purpose of effectively and efficiently disseminating Census of Canada data, Statistics Canada has developed an intricate, interlocking system of what are called "geostatistical areas". That is, geographic areas delineated or employed for the tabulation and dissemination of census data. The key to this system is the enumeration area. Defined as the spatial unit usually canvassed by one census representative (the average population is approximately 600 persons), the enumeration area (EA) is the basic building block upon which the entire geographic system rests.

Alberta Provincial Electoral Districts (PED's) are not geostatistical areas commonly recognized by Statistics Canada. Consequently, the data presented herein for each Alberta PED represents the result of an aggregation process carried across a number of relevant EA's. Data was compiled after determining the EA's contained within each of the PED boundaries. Since the EA and PED boundaries were established independently, it was not possible to establish a precise boundary match in all cases. Since EA data cannot be disaggregated to a smaller level, it was necessary, in such instances, to decide to which PED the EA in question should be allocated. This decision was based upon a number of factors.

1. The 1976 population distribution by township for the EA considered.

2. In rural Alberta, the location of incorporated and unincorporated communities both within the EA and relative to it.

3. In urban Alberta, the location of both residential neighbourhoods, and such non-residential landmarks as shopping centres and airports.

It is felt that the EA allocations made are fair and accurate, and that the resultant data is entirely representative of the situation within each PED as of 3-Jun-81. Should further explanation be required regarding the methodology employed in the production of this report, please contact Data Dissemination Unit, Alberta Bureau of Statistics, telephone (403) 427-3058.

CONFIDENTIALITY AND RANDOM ROUNDING

The figures shown in this report have been subjected to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with an identifiable individual. Under this method, all figures including totals are randomly rounded (either up or down) to a multiple of "5". This technique provides strong protection against direct, residual or negative disclosures without adding significant error to the census data. However, since totals are independently rounded, they do not necessarily equal the sum of individual rounded figures in distributions. Similarly, percentages, which are calculated on rounded figures, do not necessarily add to the total.

APPENDIX II

D E F I N I T I O N S

Provincial Electoral Districts : Refers to a territorial unit entitled to return a member to serve in the Alberta Provincial Legislative Assembly. There are 79 Provincial Electoral Districts in Alberta.

Age : Refers to age at last birthday (as of the census reference date, 3-Jun-1981).

Sex : Refers to the gender of the respondent.

Marital Status : Refers to the following conjugal status of a person:

Now married (excluding separated)
Persons whose husband or wife is living, unless the couple is separated or a divorce has been obtained. Persons living common-law are considered as "Now married";

Separated
Persons who have been deserted or who have parted because they no longer want to live together, but have not obtained a divorce;

Divorced
Persons who have obtained a legal divorce and who have not remarried;

Widowed
Persons who have lost their spouse through death and who have not remarried;

Never married (single)
Persons who never married (including all persons less than 15 years) and persons whose marriage was annulled.

Mother Tongue : Refers to the first language learned in childhood and still understood by an individual.

Occupied Private Dwelling : Refers to a private dwelling in which a person or group of persons is permanently residing. Also included are private dwellings whose usual residents are temporarily absent on Census Day.

Tenure : Refers to whether some member of the household owns or rents the dwelling.

A dwelling is classified as "owned" even if it is not fully paid for, such as one which has a mortgage or some other claim on it. The dwelling may be situated on rented or leased land or be part of a condominium (whether registered or unregistered).

A dwelling is classified as "rented" even if it is provided without cash rent or at a reduced rent or if the dwelling is part of a co-operative. For census purposes, in a co-operative all members jointly own the co-operative and occupy their dwelling units under a lease agreement.

Structural Type : Refers to the structural arrangements of the dwelling.

Single Detached : Refers to a single dwelling not attached to any other building and surrounded on all sides by open space.

Single Attached : Refers to the aggregate count of three structural types:

Semi-detached or Double House

Refers to one of two dwellings attached side by side but not attached to any other building and surrounded on all other sides by open space.

Row House

Refers to one of three or more dwellings joined side by side but not having any other dwellings either above or below.

House Attached to a Non-residential Building

Refers to a single dwelling attached at ground level to another building (such as a store, etc.) but separated from it by a common wall running from ground to roof.

Apartment in a Building That Has Five or More Storeys : Refers to a dwelling unit in a high-rise apartment building.

Apartment in a Building That Has Less Than Five Storeys : Refers to a dwelling unit in a triplex, quadruplex or a dwelling unit in a non-residential building or in a house that has been converted.

Duplex : Refers to one of two dwellings, one above the other, not attached to any other building and surrounded on all sides by open space.

Private Household : Refers to a person or group of persons (other than foreign residents) who occupy a private dwelling and do not have a usual place of residence elsewhere in Canada. The number of private households equals the number of occupied private dwellings.

Household Size : Refers to the number of persons in a private household.

Census Family : Refers to a husband and a wife (with or without children who have never married, regardless of age), or a lone parent of any marital status, with one or more children who have never married, regardless of age, living in the same dwelling. For census purposes, persons living in a common-law type of arrangement are considered as now married, regardless of their legal marital status; they accordingly appear as a husband-wife family in the census family tables.

Census Family Composition : Refers to the classification of census families in terms of the number and/or age groups of children at home.

Census Family Status : Refers to the classification of the population into family and non-family persons.

Family persons refers to household members who belong to a census family.

Non-family persons refers to household members who do not belong to a census family.

Census Family Structure : Refers to the classification of census families into husband-wife families (with or without children present) and non-parent families.
